Features

Getting Started · https://scopematch.com/docs/features/

- **Home Dashboard:** Start from a central dashboard with quick stats, recent news, alerts, and shortcuts, giving you an at-a-glance overview of your supply chain and fast access to all platform features.
- **Company Profile:** Showcase your company with a detailed profile including legal name, certifications, values, locations, contacts, partners, audits, sourcing countries, and services, helping you build credibility and connect with the right organizations.
- **Catalog:** Easily showcase your products by uploading them via Excel, with customizable dropdowns that keep data clean, structured, and searchable for other users.
- **Product Directory:** Keep a structured list of the products your company buys, alongside the Catalog of the products you sell. See Product Directory.
- **Product-Supply (Material-Supply):** Easily create and manage product (or material) lists with linked suppliers, sourcing locations, status fields, and internal notes, all automatically cross-referenced with ScopeMatch supplier profiles. Validation columns instantly confirm if listed products and locations match the supplier’s profile, and updates such as catalog changes, new locations, or corporate changes show up in your lists when suppliers update their profiles. This centralized, folder-like system helps you efficiently organize suppliers and customer data, share information internally, and streamline analysis through customizable lists.
- **Product-Distribution:** Organize what products your customers buy, their locations, and their status (e.g., contract, project, distributor) in a folder-like system, for a clear view of your distribution channels.
- **Network Analysis:** Analyze supplier lists to uncover single-sourced products, bottleneck vendors, country-of-origin dependencies, key suppliers, and recurring patterns, helping you spot risks and opportunities in your supply network.
- **Disruption Simulation:** Simulate supply chain disruptions, such as losing a supplier or a sourcing country, to see how your network, products, and sourcing would be affected, helping you plan for risks and build resilience.

- **Search Request:** Quickly search our database to find suppliers, distributors, customers, or service providers by company type, country, and business scope criteria such as certifications or corporate values, ensuring you connect with the right partners for your needs.
- **Sourcing Helper:** Let our AI-powered Sourcing Helper recommend the best countries for your sourcing needs. By analyzing your company profile, priorities (like speed, pricing, or quality), and other considerations, it provides a tailored list of countries with insights to help you avoid blind spots.
- **Recent News:** Stay informed with a regularly updated feed of supply chain news from trusted sources, giving you quick access to the latest headlines, market updates, and industry developments in one place.
