Release Updates

General · https://scopematch.com/docs/release-updates/

Older entries are kept as they were written at the time. Plans and features have changed since; see Tiers and Features for what each plan includes today.

Our plans have new names and limits, and new features are now available.

- **New plans:** Free (Explore), Basic (Organize), Pro (Analyze) and Premium (Advise). Free now includes the Home Dashboard, 10 products, one supplier list with up to 10 vendors and a Network Analysis preview. Basic includes 250 products and 5 lists with up to 50 vendors each. See Tiers and Features.
- **AI Catalog Parsing:** upload your existing product catalogs and let AI turn them into structured catalog entries you review before saving.
- **Document Intelligence** (Pro and Premium): AI reads the key details from supplier documents such as certificates and audits for you to review.
- **Coming soon, MCP Connector** (Pro and Premium): connect Microsoft Copilot, Grok, Claude, ChatGPT or another AI assistant to read and add ScopeMatch data in plain language.
- **7-day demo workspace:** after onboarding, try the paid features with sample data, kept separate from your company data.
- **Also available:** the Vendor Management add-on and the Product Directory for the products you buy.

We've nearly completed the refactoring of our app and have begun the re-relaunch process. Currently, only the **Free** and **Basic** tiers are available, with more tiers arriving soon. In the upcoming weeks, expect enhancements to user profiles and exciting new subscription options.

Thanks for your patience and support!

- **General Updates**

- Existing user data has been securely migrated. Users are advised to verify their profile information upon login.
- New type of companies: fabricators, equipment suppliers, and material suppliers. Refer to Company Types for details.

- **New Features**
  - New onboarding flows to allow users join an existing company profile, claim their ownership, or create new ones.
  - Notifications system to alert users about important events. Refer to Notifications for details.
  - New home dashboard (paid tiers) Includes interactive map integration and pending notifications.

- **Improvements**
  - The app has been significantly optimized for improved performance and scalability.
  - Improved overall design for easier navigation.
  - Enhanced user interface and simplified data entry experience.
  - **Profile Enhancements:**
    - Add details about your connections to improve credibility and clarify your corporate structure.
    - Specify details about your operational locations.
    - Option available to keep certain profile details hidden from other users.

- **Temporarily unavailable**
  - Pro and Premium subscription tiers. See more details in Tiers and Features.
  - Certain profile tools and user access management.

Coming Soon (April 2025):

- Launch of **Product-Supply** feature exclusively for users who request it.
- Overall enhancements and bug fixes.

- **New Features**

- **Audits** Section on Profiles
  - A new "Audits" section has been added to the company profiles. This helps boost trust and transparency by showing who requested and performed each audit.
- **Bulk Upload for Product Catalog**
  - You can now bulk upload products into the catalog, including the ability to add new categories, specifications, and specification values. Read here for more information.
- **Product-Supply**
  - Introduced a new feature that allows users to list products they or their customers need, along with matching suppliers.
  - This is a key step toward building and mapping your vendor network, which will be further enhanced by our upcoming **Vendor Network Analysis Tool** (coming this summer).
  - Note: To ensure the best user experience, this feature is currently available by request only.

- **Improvements**
  - **Updated Icons for Better Navigation**
    - Refreshed iconography to make navigating the platform more intuitive and user-friendly.
  - **General Bug Fixes**
    - Various fixes to improve stability and performance.

Coming Soon (May 2025):

- Launch of **Search-Request** feature exclusively for Pro subscribers. You will be able to search in our database partners that match your search criteria.
- Overall enhancements and bug fixes.
